Dear Collegues,

On behalf of all co-workers of our department it is my pleasure to welcome you during the second semester of the academic year 2018/2019!

The main goal of our teaching programme is to give some insight into the wonderful world of clinical anaesthesia and critical care and to provide you some useful theoretical informations as well as practical skills.

We are convinced that you – as you soon will become physicians – will be interested in our topic and therefore we are trying to provide you useful practical information on airway management, mechanical ventilation, central venous cannulation, monitoring devices and treatment possibilities in critical care.

As you can realize from the program schedule below, between weeks 1-5 our practical are held in the simulations center where you will be able to have some hands-on opportunities of different skills.

From weeks 6 our practicals are held at bedside, therefore we devided the groups into two subgroups in order to be able to bring you to patient care as close as possible. Therefore, as you will see from the timetable, groups are divided into subgroups a. and b. Halving occurs on the basis of alphabetical order by your own. Please accept these rules in order to enable effective teaching circumstances.

For those who show special interest to our topic, we give the opportunity to attend to the night duties of the ICU at the Augusta Center. Beside this, students are welcome to participate in our young researchers programme or to complete their diplome work at our department.

Every student will have a confirmation of attendance page that has to be signed by the tutor during all practicals. This is the prerequisit of the exam at the end of the semester.

Would you have any further questions, please do not hesitate to contact the responsible person for teaching: Mr. Ákos Fábián MD

I hope you will enjoy the semester and at the end you will feel that you were provided with useful skills.

Regards:

Béla Fülesdi
Professor of Anesthesiology and Intensive Care
